

Studio Physics: Researching new ways of teaching and learning

Patrick B. Kohl, H. Vincent Kuo, Todd G. Ruskell

Studio Physics is a learning environment built from the ground up to take advantage of the latest results from physics education research. Students work in teams on structured activities and benefit from a low student-to-teacher ratio.

**Pre and Posttest Scores,
Conceptual Survey on E&M**

In keeping with CSM's tradition of continual improvement, we are researching ways to make Studio Physics even more effective.

We track student performance (both in class and on research-derived surveys) along with their attitudes about science and continually revise the curriculum in response.
