

- Mineral processing specialist position -

Who is CRU?

CRU is the world's leading business analysis and consultancy group focused on the metals, mining and chemical industries.

What is the position?

CRU is seeking an engineer or metallurgist with extensive knowledge in mineral processing techniques. The successful candidate will take a leading role in the design of the technical portion of cost and production models. Furthermore, he or she will play an active role in consulting projects and analysis of the cobalt and nickel industries. The position offers excellent advancement opportunities, frequent international travel, and the possibility to be based in one of CRU's Seattle, London, or Perth offices. A highly competitive salary and benefits package will be based on experience.

Who are we looking for?

The ideal candidate will have at least five years' experience working with hydrometallurgical and pyrometallurgical processes. Specific expertise in the areas of cobalt and nickel processing is highly desirable as well as a detailed understanding of ore beneficiation, smelting, roasting, leaching, refining, and SX/EW technologies. Cost modeling experience would also be advantageous.

Interested?

Interested and qualified candidates, please send a resume and cover letter to Taylor Shively at taylor.shively@crugroup.com with "Mineral processing specialist" in the subject line.
