DEPARTMENT OF ECONOMICS & BUSINESS

ECONBUS.MINES.EDU

Building leaders with the quantitative skills to make informed business decisions.

PROGRAM SCOPE
The Business Engineering and Management Science degree combines data science, operations research and business principles to provide students a modern toolset for business decision-making. Students choose from focus areas in Business Analytics, Technology Management, Advanced Manufacturing and Machine Learning & Artificial Intelligence.

The Economics degree is grounded in mathematics, providing the students the quantitative skills used in policy and business analysis with a focus on Earth, Energy and Environment.

OPEN DOORS
Economics and business graduates leave with a competitive and technological advantage to enter careers in energy, business, government, consulting and graduate education.
