John Stockwell has been a Research Associate with CWP for more than 27 years. With CWP co-founder Jack K. Cohen, John received the 1994 University to Industry Award from the Colorado Chapter of the Technology Transfer Society for his work with the CWP/SU: Seismic Un*x open source seismic software package (SU). In 1996, after the untimely death of Jack Cohen, John became the Principal Investigator of the SU project.

In 2001, Norman Bleistein, Jack Cohen, and John Stockwell co-authored Mathematical Methods of Multi-dimensional Seismic Imaging and Migration, a graduate level mathematical textbook on the theory of seismic imaging, collecting the previous 20 years of research of the Center for Wave Phenomena.

With Jack K. Cohen, Shuki Ronen, and Einar Kjartansson, John received a Special Commendation in 2002 from the Society of Exploration Geophysicists (SEG) for the SU package.

John was named SEG Foundation Volunteer of the Year in 2005.

In 2014, John received the SEG Presidential Award for his work with the SEG Wiki and for his work with SU. John was also named SEG Wiki Champion in 2014.

John Stockwell continues his work with Seismic Unix: https://github.com/JohnWStockwellJr. John may be contacted at john.19071969@gmail.com.
