

Hazardous Waste Satellite Accumulation Area

Inspect Satellite Accumulation Areas Weekly

Lids

- Close the container so it won't spill if tipped over.
- Use vented cap or vented burp funnel to prevent over-pressurization of reactive materials.
- Do not leave funnels in waste containers.

Labels

- Label the container as "Hazardous Waste"
- Checkmark the primary hazard(s) (Flammable, Toxic, Corrosive, Reactive).
- List all chemical names (no abbreviations), and include volume and/or percentage.
- Label all waste containers immediately.

Leaks

- Use waste containers that are compatible with the contents.
- Segregate incompatible materials into separate secondary containers.
- Always use secondary containment.
- Contact EHS immediately if container is leaking.

Location

- Keep waste in the room where it was generated.
- Do not store waste longer than 6 months.
- Submit waste pick-up requests online at mines.edu/ehs
