

We are seeking seed funding to establish a Mines Money Center. The center will house currently offered personal finance programs as well as expand the opportunities available for Mines students to develop their financial acumen. The seed money will be used to support and develop the center in three phases. During the first phase, the existing 'I Dig Money' program will be offered, and we will develop a series of workshops and self-guided modules on a variety of financial topics, including (but not limited to) Financial Planning, Retirement Accounts, and Student Loans. In phase two, we will develop a one-on-one financial coaching program that will be freely available to students and possibly to staff. In the final phase, we will develop for-credit financial wellness classes available for all students. Offering a signature student experience is not complete without training our students to be strong financially for today and tomorrow.

Hello,

We are seeking seed funding to establish a Mines Money Center. The center will house currently offered personal finance programs as well as expand the opportunities available for Mines students to develop their financial acumen. The seed money will be used to support and develop the center in three phases. During the first phase, the existing 'I Dig Money' program will be offered, and we will develop a series of workshops and self-guided modules on a variety of financial topics, including (but not limited to) Financial Planning, Retirement Accounts, and Student Loans. In phase two, we will develop a one-on-one financial coaching program that will be freely available to students and possibly to staff. In the final phase, we will develop for-credit financial wellness classes available for all students. Offering a signature student experience is not complete without training our students to be strong financially for today and tomorrow.

Andrew Pederson & Dr. Becky Lafrancois
