Subject: Re: Mines-Faculty: Expression of Interest for RFP Student Signature Experience
Date: Monday, November 2, 2020 8:27:17 AM

Good Morning Members of our Senate,

Expression of Interest:

Unlike many higher education institutions, we have adapted better than most to teaching with the effects of and restrictions triggered by the Covid-19 pandemic. We propose investing in a series of pilot programs to "Expand offerings and diversify delivery" of professionally oriented curricula," per the Mines@150 vision. In particular, we propose targeting out-of-state and international students who cannot or do not want to move to Golden to take advantage of our popular program in innovation and entrepreneurship. In the past, out of state and international students contributed a significant portion of student tuition. We ought to invest in developing our programs to expand our share of this vast and growing student segment. We must add tremendous value in how we deliver and engage these students to justify and capture our value. This fall semester, we proved the viability of our approach. We would like to scale our program.

Thank you, Sid

Sid Hanna Saleh, Ph.D.

Are you working on your proposal for the Student Signature Experience? Remember, send a short paragraph as an **Expression of Interest** to senate@mines.edu by **November 2nd**. We are asking for an Expression of Interest to determine the number and amount of proposals.

Currently, we have two sessions scheduled to provide proposal assistance: Nov. 9th and Nov. 12th. We could add another session if necessary. The sessions aim to provide preliminary feedback and an opportunity to connect with others if they might have similar ideas. After you submit your Expression of Interest, Julie Lambert coordinate adding you to one of the proposal assistance sessions.
