---

Dear Faculty Senate,

The purpose of this email is to document an Expression of Interest in responding to the recent solicitation for proposals in regard to the Signature Student Experience.

The proposal is called “Advancing Student Chapters”. This program seeks to advance student engagement with national professional societies to further the experiences of students, while directly promoting student careers following graduation. We request \$50k in funding to provide one month of summer-salary support for five faculty advisors of key student chapters of national organizations. Faculty advisors will use this support to work with student-chapter leadership to create new, meaningful programming to be executed by the student chapter during the coming academic year.

I look forward to sharing the full proposal with Faculty Senate.

Sincerely,  
Neal Sullivan
