

# Innov8<sup>x</sup> Studio

## Bring Us Your Problems

**Unique partnership opportunity to harness School of Mines student ingenuity.**

Project managers & executives working in innovation initiatives can often benefit from a fresh perspective. **Innov8<sup>x</sup>** invites innovators in corporate, government, and non-profit organizations .

### MINES STEM STUDENTS CAN WORK WITH YOU TO:

- Take a deep look at a complex problem and "sort through the noise".
- Talk with stakeholders objectively to identify opportunities.
- Explore and test many potential solutions quickly.

**Innov8<sup>x</sup>** is an advanced innovation program at Mines. Our unique approach leverages the top engineering, science and technical minds to investigate practical problems that matter to you. This critical step is often overlooked or under-investigated by many well-intentioned innovators who "fall in love with their solution" and rush prematurely to implement.

We've previously worked with government agencies, military, law enforcement, and local technology companies to support product development, identification of untapped market opportunities and developing solutions that save time, money, and lives. Our teams are guided to:

- Take a fresh look at a serious problem or one that you're "stuck".
- Develop and rapidly test potential solutions with minimal investment.
- Work with your team to focus on implementation feasibility.

## SPONSOR A CHALLENGE THIS SUMMER OR FALL

Contact [Innovation@mines.edu](mailto:Innovation@mines.edu) and invigorate your innovation effort today. Learn more at [Innov8<sup>x</sup> Studio](#). Discover past sponsor problems at [Innov8<sup>x</sup> Course](#).
