

## Where Can I Go for Sexual Assault Medical Care?

Sexual Assault Nurse Examiner (SANE) and Medical Forensic Exam (MFE) programs have medical professionals trained in sexual assault response and care. These programs provide medical care and evidence collection, if desired, for sexual assault victims (*evidence collection is not required to obtain sexual assault specific medical care*). Most of these programs exist within hospital emergency departments.

Most health care facilities should be able to provide sexually transmitted infection (STI) testing, as well as STI and pregnancy prevention and treatment. If these medical facilities will not provide those services, contact an advocate or your nearest SANE/MFE program for assistance. The Colorado School of Mines partners with Victim Outreach Inc. You may contact them at: 303.202.2196 or [www.victimoutreach.org](http://www.victimoutreach.org).
