

## Reuleaux Faculty Advisor Form

This form is required to submit to Reuleaux. Papers submitted without a completed copy of this form will not be considered for publishing without prior approval from the Reuleaux board.

The faculty advisor is the supervisor for the research that was conducted for submission to Reuleaux. This advisor does not necessarily need to be a member of the Colorado School of Mines as long as the student researcher is an undergraduate Mines student. In the event that research was conducted independently without the direct supervision of a faculty advisor, it is recommended that a mentor experienced in the relevant field of study be contacted to fulfill the faculty advisor position during the development of a submission to Reuleaux.

If this submission is published in Reuleaux, the faculty advisor's name will appear in conjunction with the article. By signing this form, you (the faculty member) agree that the submission satisfies the requirements for publication in Reuleaux, including those mentioned below. The submission must:

- ❖ Contain original research and ideas.
- ❖ Accurately reflect the work done by the student
- ❖ Be professional, of quality, and publishable.
