

WHERE MME STUDENTS GO

Student pursuits one-year post-graduation:

Industries of employment for students one year out:

- Aerospace/Defense/Aviation
- Civil/Construction & Building Trades
- Energy - Oil & Gas
- Healthcare/Medical Equipment
- Manufacturing
- Metals
- Mining

Job titles of our graduates one-year out:

- Materials Engineer
- Mineral Processing Engineer
- Foundry Engineer
- Materials & Corrosion Engineer
- R&D Engineer
- Metallurgist

This menu is a tool for you to use to explore opportunities at Mines outside of the classroom. These are not requirements, but rather recommendations to help you leverage what Mines has to offer. Just like at a restaurant, choose what looks best to you and start from there! This menu can help you create your own pathway and customize your experience during your time at Mines.

The activities are placed in specific years based off staff and faculty recommendations, but you can participate in most of them at any time. There is never a wrong time to get involved if you're looking, and no pressure to do any of these things!

Get to know MME

The Metallurgical & Materials Engineering program is ABET accredited and provides students with a fundamental knowledge of the processing, properties, selection, and application of structural and functional materials. We educate engineers who are on the leading edge of modern technology, constantly developing new materials for numerous applications including in electronics, aerospace, transportation, biomedical, and energy. Mines MME graduates work in a wide spectrum of manufacturing industries including metal products, automotive and aerospace industries and semiconductor fabrication.

There are several facilities available for undergraduate classes with lab components as well as design projects. The Hot Shop includes foundry/casting, forging, glass blowing and some welding equipment along with other facilities that provide materials analysis tools, mechanical testing and additional welding instruments. These provide students with spaces to apply concepts and gain hands-on experience.

"It is clear that the MME department really cares about its students and that the professors are invested in students' learning and also willing to develop positive relationships."
