

KIEWIT Infrastructure Company

Presentation Title: *McCook Reservoir Tunnel*

The McCook Reservoir is currently under construction by Kiewit, when completed, the reservoir will have a total capacity of 10 BG. Phase 1 of the reservoir is planned to be completed by 2017. The McCook Reservoir will provide over \$90 million per year in flood damage reduction benefits to 3,100,000 people in 37 communities. This project includes drill and blast excavation, concrete tunnel lining, steel tunnel liner, and a high head gate system to control the water in-flows.

WEDNESDAY SEPT 12TH NOON
