## LUNCH & LEARN

### THE UNDERGROUND INDUSTRY PROFESSIONAL PANEL DISCUSSION

September 11th, 12-1PM

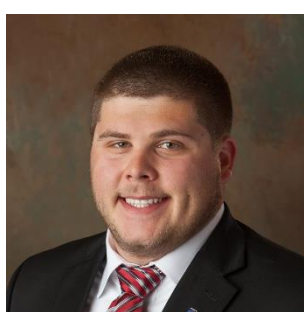

Coolbaugh Hall Room 209 – **NEW LOCATION**

Come join us for a panel discussion comprised of young engineers from the underground industry. Get your questions ready and prepare for an honest session from our professional panel.

**Tim Fishel** is an Engineer in the Tunneling Division for Michels. His responsibilities include working with the project management team and field personnel to plan the work; and performing QA/QC on the job to ensure that the product being installed meets project specifications. Tim is a 2014 Graduate of the Colorado School of Mines with a degree in Petroleum Engineering.

**Justin Carrico** is a Project Engineer II with The Walsh Group. His responsibilities include: Preparing submittals & RFIs, managing subcontractors, scheduling activities, order material, ensure quality and safe work. Justin holds a Degree in Civil Engineering.

**Matthew Ulizio** is a Tunnel Engineer on the Central Water Integration Pipeline 5-1, San Antonio Water System in San Antonio, Texas. His responsibilities include coordination of the field engineering on the project, including planning of operations, construction operations, and personnel management: TBM management, quantity management, cost management, production management, daily reporting oversight, and day-to-day operation oversight.

**Richard Aipperspach** is working as a Mechanical Engineer with AECOM. He has extensive field experience as a Construction Manager prior to transitioning to engineering. Richard is a recent 2019 Graduate of the Colorado School of Mines with a degree in Petroleum Engineering. Matt holds a degree in Mining Engineering.
